

## AMENDMENTS TO THE CLAIMS

The listing below is to replace all prior versions, or listings, of claims in the present application.

1. (currently amended) A user interface for providing instructional information, comprising:  
instructional text describing a plurality of steps to perform a task; and  
a plurality of alternative media indicators, at least one~~each~~ of the plurality of alternative media indicators associated with two ~~one~~ or more of the plurality of steps and selectable to cause presentation of an alternative media presentation instructing performance of the associated ~~one~~ two or more of the plurality of steps.

2. (currently amended) A user interface according to Claim 1, wherein a first of the alternative media indicators is associated with a first ~~one~~ two or more of the plurality of steps, and wherein a second of the alternative media indicators is associated with a second ~~one~~ two or more of the plurality of steps, ~~and wherein a third of the plurality of alternative media indicators is associated with the first one or more of the plurality of steps and with the second one or more of the plurality of steps.~~

3. (original) A user interface according to Claim 2, wherein each of the plurality of steps is associated exclusively with one of the alternative media indicators.

4. (currently amended) A user interface for providing instructional information, comprising:  
a search interface for allowing input of search terms, for presenting a plurality of search results, and for allowing selection one of the plurality of search results; and  
an instructional interface for presenting instructional text describing a plurality of steps to perform a task and an alternative media indicator associated with ~~an alternative media presentation~~ at least two of the plurality of steps,

wherein, after selection of the one of the plurality of search results, the plurality of search results and the instructional interface are presented simultaneously, the simultaneously presented instructional interface comprising instructional text and an alternative media indicator corresponding to the selected one of the plurality of search results.

A1  
5. (original) A user interface according to Claim 4, wherein selection of another one of the plurality of search results causes the instructional interface to present instructional text and an alternative media indicator corresponding to the another one of the plurality of search results simultaneously with presentation of the plurality of search results.

---

6. (cancelled)

---

A2  
7. (currently amended) A user interface according to Claim 64, wherein the instructional interface presents a plurality of alternative media indicators.

---

8. (cancelled)

---

A3  
9. (currently amended) A user interface according to Claim 85, wherein selection of ~~one~~ of the alternative media ~~indicator~~ ~~indicators~~ causes presentation of an alternative media presentation, the alternative media presentation instructing performance of the associated ~~one~~ two or more of the plurality of steps.

---

10. (cancelled)

---

11. (cancelled)

---

A4  
12. (currently amended) An apparatus for providing instructional information, comprising:  
an output device for presenting information;  
an input device for receiving information;  
a processor; and

a memory storing processor-executable process steps,  
wherein the processor executes the processor-executable process steps: to present, using the output device, instructional text describing a plurality of steps to perform a task, and a plurality of alternative media indicators, ~~each~~ at least one of the plurality of alternative media indicators associated with ~~one two~~ or more of the plurality of steps; to receive, using the input device, a selection of the at least one of the plurality of alternative media indicators; and to present, using the output device, an alternative media presentation instructing performance of the ~~one two~~ or more of the plurality of steps associated with the selected alternative media indicator.

13. (currently amended) An apparatus according to Claim 12, wherein a first of the alternative media indicators is associated with a first ~~one two~~ or more of the plurality of steps, and wherein a second of the alternative media indicators is associated with a second ~~one two~~ or more of the plurality of steps, ~~and wherein a third of the plurality of alternative media indicators is associated with the first one or more of the plurality of steps and with the second one or more of the plurality of steps.~~

14. (original) An apparatus according to Claim 13, wherein each of the plurality of steps is associated exclusively with one of the alternative media indicators.

15. (currently amended) An apparatus for providing instructional information, comprising:  
an output device for presenting information;  
an input device for receiving information;  
a processor; and  
a memory storing processor-executable process steps,  
wherein the processor executes the processor-executable process steps: to present, using the output device, a search interface for inputting search terms, for presenting a plurality of search results, and for allowing selection of one of the plurality of search results, and an instructional interface for presenting instructional text describing a plurality of steps to perform a task and an alternative media indicator associated with ~~an alternative media presentation at least two of the plurality of steps~~; to receive, using the input device, a selection of the one of the

plurality of search results; and, after the selection is received, to present, using the output device, the plurality of search results and the instructional interface simultaneously, the simultaneously presented instructional interface comprising instructional text and an alternative media indicator corresponding to the selected one of the plurality of search results.

16. (original) An apparatus according to Claim 15, wherein the processor further executes the process steps:

- to receive a selection of another one of the plurality of search results; and
- to present instructional text and an alternative media indicator corresponding to the another one of the plurality of search results in the instructional interface.

17. (cancelled)

18. (currently amended) An apparatus according to Claim ~~17~~15, wherein the instructional interface presents a plurality of alternative media indicators.

19. (cancelled)

20. (currently amended) An apparatus according to Claim ~~19~~16, wherein the processor further executes the process steps:

- to receive a selection of ~~one of~~ the alternative media ~~indicators~~indicator; and
- to present an alternative media presentation, the alternative media presentation instructing performance of the associated ~~one two~~ or more of the plurality of steps.

21. (cancelled)

22. (cancelled)

23. (currently amended) A method for providing instructional information, comprising:

presenting instructional text describing a plurality of steps to perform a task, and a plurality of alternative media indicators, ~~each at least one~~ of the plurality of alternative media indicators associated with ~~one two~~ or more of the plurality of steps;

receiving a selection of the at least one of the plurality of alternative media indicators;  
and

presenting an alternative media presentation instructing performance of the ~~one two~~ or more of the plurality of steps associated with the selected alternative media indicator.

24. (currently amended) A method according to Claim 23, wherein a first of the alternative media indicators is associated with a first ~~one two~~ or more of the plurality of steps, and wherein a second of the alternative media indicators is associated with a second one or more of the plurality of steps, ~~and wherein a third of the plurality of alternative media indicators is associated with the first one or more of the plurality of steps and with the second one or more of the plurality of steps.~~

25. (original) A method according to Claim 24, wherein each of the plurality of steps is associated exclusively with one of the alternative media indicators.

26. (currently amended) A method for providing instructional information, comprising:  
presenting a search interface for inputting search terms, for presenting a plurality of search results, and for allowing selection of one of the plurality of search results, and an instructional interface for presenting instructional text describing a plurality of steps to perform a task and an alternative media indicator associated with ~~an alternative media presentation at least two of the plurality of steps~~;

receiving a selection of the one of the plurality of search results; and  
presenting, after the selection is received, the plurality of search results and the instructional interface simultaneously, the simultaneously presented instructional interface comprising instructional text and an alternative media indicator corresponding to the selected one of the plurality of search results.

27. (original) A method according to Claim 26, further comprising:

receiving a selection of another one of the plurality of search results; and  
presenting instructional text and an alternative media indicator corresponding to the  
another one of the plurality of search results in the instructional interface.

28. (cancelled)

29. (currently amended) A method according to Claim ~~28~~26, wherein the instructional  
interface presents a plurality of alternative media indicators.

30. (cancelled)

31. (currently amended) A method according to Claim ~~30~~27, further comprising:  
receiving a selection of ~~one of the alternative media indicators~~indicator; and  
presenting an alternative media presentation, the alternative media presentation  
instructing performance of the associated ~~two~~one or more of the plurality of steps.

32. (cancelled)

33. (cancelled)

34. (currently amended) A computer-readable medium storing processor-executable  
process steps to provide instructional information, the process steps comprising:  
a presenting step to present instructional text describing a plurality of steps to perform a  
task, and a plurality of alternative media indicators, ~~each at least one~~at least one of the plurality of  
alternative media indicators associated with ~~one two~~one or more of the plurality of steps;  
a receiving step to receive a selection of the at least one of the plurality of alternative  
media indicators; and  
a presenting step to present an alternative media presentation instructing performance of  
the ~~one two~~one or more of the plurality of steps associated with the selected alternative media  
indicator.

35. (currently amended) A computer-readable medium according to Claim 34, wherein a first of the alternative media indicators is associated with a first ~~one~~ two or more of the plurality of steps, and wherein a second of the alternative media indicators is associated with a second ~~one~~ two or more of the plurality of steps, ~~and wherein a third of the plurality of alternative media indicators is associated with the first one or more of the plurality of steps and with the second one or more of the plurality of steps.~~

36. (original) A computer-readable medium according to Claim 35, wherein each of the plurality of steps is associated exclusively with one of the alternative media indicators.

37. (currently amended) A computer-readable medium storing processor-executable process steps to provide instructional information, the process steps comprising:

 a presenting step to present a search interface for inputting search terms, for presenting a plurality of search results, and for allowing selection of one of the plurality of search results, and an instructional interface for presenting instructional text describing a plurality of steps to perform a task and an alternative media indicator associated with ~~an alternative media presentation~~ at least two of the plurality of steps;

a receiving step to receive a selection of the one of the plurality of search results; and  
a presenting step to present, after the selection is received, the plurality of search results and the instructional interface simultaneously, the simultaneously presented instructional interface comprising instructional text and an alternative media indicator corresponding to the selected one of the plurality of search results.

38. (original) A computer-readable medium according to Claim 37, the process steps further comprising:

a receiving step to receive a selection of another one of the plurality of search results; and  
a presenting step to present instructional text and an alternative media indicator corresponding to the another one of the plurality of search results in the instructional interface.

39. (cancelled)

40. (currently amended) A computer-readable medium according to Claim ~~39~~37, wherein the instructional interface presents a plurality of alternative media indicators.

41. (cancelled)

42. (currently amended) A computer-readable medium according to Claim ~~41~~38, the process steps further comprising:  
a receiving step to receive a selection of ~~one of the alternative media indicators~~indicator;  
and  
a presenting step to present an alternative media presentation, the alternative media presentation instructing performance of the associated ~~one two~~ or more of the plurality of steps.

43. (cancelled)

44. (cancelled)

45. (new) A user interface according to Claim 1, further comprising an "All" alternative media indicator selectable to cause presentation of an alternative media presentation instructing performance of each of the plurality of steps:

46. (new) A user interface according to Claim 4, the instructional interface for presenting an alternative media indicator selectable to cause presentation of an alternative media presentation instructing performance of each of the plurality of steps.

47. (new) An apparatus according to Claim 12, the processor-executable process steps executable to present an alternative media indicator selectable to cause presentation of an alternative media presentation instructing performance of each of the plurality of steps.

48. (new) An apparatus according to Claim 15, the instructional interface for presenting an alternative media indicator selectable to cause presentation of an alternative media presentation instructing performance of each of the plurality of steps.

49. (new) A method according to Claim 23, further comprising presenting an alternative media indicator selectable to cause presentation of an alternative media presentation instructing performance of each of the plurality of steps.

50. (new) A method according to Claim 26, the instructional interface for presenting an alternative media indicator selectable to cause presentation of an alternative media presentation instructing performance of each of the plurality of steps.

51. (new) A medium according to Claim 34, further comprising a presenting step to present an alternative media indicator selectable to cause presentation of an alternative media presentation instructing performance of each of the plurality of steps.

52. (new) A medium according to Claim 37, the instructional interface for presenting an alternative media indicator selectable to cause presentation of an alternative media presentation instructing performance of each of the plurality of steps.
